3 Getting Started

1. Battery

The battery is initially charged 50% only and can be used after fully charged. For the first three times needs charging & discharging, do not recharge until the battery is totally exhausted, so that the battery can reach its best usage performance.

1.1 Removing and installing battery

For removing:

- Push the battery back cover;
- Lift the battery up as indicated by the arrow;
- Take the battery out.

Warning: Make sure to power off the phone before taking out SIMcard, otherwise your

SIMcard might be damaged.

For installing:

- A. Place the metal contact points of the battery upward and flush with metal contact points in the battery slot, then insert the bottom of battery into battery slot;
- B. Place the back cover of the battery onto the phone squarely, and push in the direction of the arrow till it clicks into place.

1. 2 Charging Battery

While charging, the power supply indicator at phone's screen icon zone will flash in a rotation manner, if the phone is off while charging, a charging screen will still appear, indicating that the phone is recharging. If the phone is still being overused while the power supply is insufficient, the recharging indicator will appear on the screen after the recharging has started for a while.

When the power supply indicator at the screen's icon zone shows full and stops flashing, it means charging has completed. If it takes place when the phone is off, the screen will display charging-finished icon. The process generally takes about 2.5 hours. It is normal that the battery, the phone and the charger will become hot during the charging process.

After completing charger, disconnect the phone and the charger from the AC power supply.

Note: Battery must be charged in a well ventilated place with surrounding temperature at -10°C ~ $+55^{\circ}\text{C}$, and it is imperative that a charger provided by manufacturer is used. Using unauthorized charger might cause danger, which also violates warranty terms prescribed by the manufacturer. If the charging temperature is too high or too low, the phone will automatically give warning and stop charging, so as to prevent damages to battery.

2. Connecting to Network

2.1 SIMcard

A valid SIM (Subscriber Identity Module) card must be inserted in the phone before using it.

All information related to making connection to the network are recorded in the chips of SIMcard, including the names, phone numbers and short messages you have stored in the SIMcard Phone book. In order to prevent loss or damage of the info in the SIMcard, it is necessary to avoid touching metal contact surface, and keep SIMcard far from electricity current and magnet.

2.2 Inserting and removing SIMcard

Power off the phone; remove battery and other external power connection, as shown in the image.

Insert SIMcard into SIMcard socket.

When you need to remove SIMcard, please power off the phone first, remove battery, then remove the card.

2.3 Inserting and removing memory card

Power off the phone; remove battery and other external power connection. Insert memory card into card slot as shown in the image.

2.4 Power on/off phone

To power on or power off phone, please press and hold the Disconnect key. Then the screen will display the following prompts in sequential order:
 Enter phone password – if you have set up phone lock password.
 Enter PIN – if you have set up SIMcard password.
 Search – the phone will search till finding appropriate network connection.

2.5 Unlocking SIMcard

To prevent illegal usage, PIN (Personal Identification Number) code is adopted to encrypt for protection of your SIMcard. Selecting this option and if having set up PIN code protection, you have to enter PIN code each time you start it, unlocking SIMcard to use the mobile phone.

Users can erase SIMcard password; however, in this case SIMcard cannot prevent illegal usage.

Press and hold the Ring off key to power on the phone;

Enter PIN1 code, use Right function key to delete input-errors, Left function key for "OK". For instance, if PIN1 setting is 0000, then enter the following input: 0 0 0 0 "OK"
 If there are three consecutive input errors, your SIMcard will be locked up by the

network, the phone will inquire PUK1 code.

Note: Your service provider will set up a standard PIN (4 to 8 digits) number for your SIMcard; you should change it into your private password as soon as possible.

2.6 Unlocking phone

The phone lock protects your phone from unauthorized use. The default phone lock code is 0000. You can change it into any numeric string of 4 to 8 digits.

If the phone lock function is enabled, you need to enter the correct phone lock code when the phone is powered on or in the standby mode.

2.7 Connecting to network

After SIMcard is successfully unlocked, the phone will automatically search available network (with searching showing on the screen). Once the connection is made, the name of the service provider will be displayed on the top central part of the text and graphic area. At this time your phone has been connected to the service network.

Note: If the screen prompts "Emergency ", this means you have moved out of the normal network coverage (service range) or your card has not passed authentication, but you can still transmit emergency calls based on signal strength.

4 Basic Functions

Making a call

When the logo of service provider appears on the display screen, you can dial or receive calls. The info bar at the upper left corner of the display screen shows network signal strength (when there are 5 info bars the signal is at its strongest).

The call quality is very likely to be affected by obstructions; therefore movement in a small area can effectively improve call performance.

Making domestic calls

Enter phone number and then press Dial Key to make the call. If the user needs to change phone number, press Right function key "Clear" back and delete numbers. Dialing animation will be displayed on the screen during dialing. Call state info will be shown on the screen after the called party ends the call

You can enter and dial domestic call following the order:

Area code Phone number Dial

Dialing extension number of fixed-line telephone

Some extension numbers of fixed-line telephone cannot be connected directly, you must dial the power board phone number, then press * key to power continually, until the screen displays "P", then dial extension number.

You can dial extension numbers of fixed-line telephone in the following order:

Area code Power board number P Extension number Dial Key

Dialing international calls

To make an international call, you may press * key to power continually, till the screen displays the pre-digit symbol "+" for international long distance call, which will enable you to make a call from any country without knowing the local international access code.

You can enter numbers in the following sequence to make an international call: + country code complete phone number Dial Key

After inputting prefix number, input the code and the complete phone number of the wanted country. The country code follows usual practice, such as Germany 49, UK 44, Sweden 46, etc.

Like making an international call, use "0" before city code number.

Dialing phone numbers in the call records

Every phone number you have dialed or received will be stored in the list of phone call records. The latest dialed, received and missed numbers will be listed, according to their types, in the respective menu of dialed calls, received calls and missed calls. When call record list is full, the old numbers will automatically be deleted. To view the list, do the followings:

In standby state press Dial key to view the record for dial calls.

All phone numbers in the list can be dialed directly by pressing the Dial key.

When the list is displayed, press "OK" to read the details, then "options" to Save or Delete the number.

Emergency calls

As long as in the network service range (which can be confirmed by checking the signal strength bars on the top left corner of the screen), you can always call emergency service. If your network supplier does not provide roaming service in your area, the screen will display "Emergency", to inform you that only emergency call is permitted. If you are within the network service range, you can also make emergency calls even without the SIMcard.

Answering a call

Press dialing key to answer an incoming call. If an earphone has been connected, use the button on the earphone to answer a call. If Any Key answer function is chosen, pressing any key, other than Ring off key and Right function key, can answer an incoming call.

Call records

Your phone can also store call records of the latest missed calls, received calls, dialed calls, the time of last call as well as total amount of received calls and total dialed calls for you.

Call options

In connected state, pressing Left function key "Options" can enter call option, or pressing Right function key "H-free" to activate speaker, under activated-hands free condition, press Right function key "H-held" to power off speaker. Operation methods of call options are the same with that of Function menu.

This call options can only be viewed during call process, moreover, the functions of call waiting, call holding, and conference calls need service support, please contact your service provider for details.

In the call options, you can make the following operations:

Hold single call

Make the current call hold.

End single call

End the current call.

New call

Enter new dialing interface.

Phonebook

Enter Phone book menu.

Messages

Enter Short message menu. Owing to restriction of network engagement, MMS function is barred during call process.

Sound recorder

Record the current call.

DTMF

Turn on or off DTMF function.

Conference*

Enter multiple party conference call state. By following the prompts, you can have the following functions: receive waiting calls, add them into multiple party call, maintain the multiple party call, talk privately with one party of the conference while maintaining all other callers, connect one party in the call conference with another party while exiting the multiple party call oneself, maintain one party of the multiple party call and end current call and all other maintained calls.

Note: The menu marked * items will only appear in special circumstances. For conference function, it is necessary to apply for service supply to corresponding service operator.

5 Usage of function menu

Scrolling search and select function

In standby state, press Left function key "menu" to enter function menu, or during the call, press "Options" to enter call option menu.

At all main menu or sub-menu interface, it is possible to press up, down, right and left keys of keypad (under menu of page scrolling, press up or down keys to realize scrolling up or down) to scroll to the function you need, then press Left function key, or OK key, to enter that function option.
